NIKITA BIICHUK

Full-Stack Developer

@ biichuknikita61@gmail.com   🔗 **nikita-biichuks-portfolio.vercel.app**   🔗 **https://github.com/nikitabiichuk2009**

SUMMARY

Full-stack developer skilled in TypeScript, Next.js, React, and Node.js with 1.5 years of practical experience. Passionate about building fast, clean, and user-focused web apps and exploring AI-powered development tools.

EXPERIENCE

Full Stack Developer

Tech Forge Studio

📅 04/2024 - Present   📍 Remote

A dynamic engineering studio of highly skilled developers focused on delivering exceptional products and exploring creative technical solutions.

- Worked across the full stack with TypeScript, Next.js, React, React Native (with Expo), Node.js, MongoDB, and other modern technologies, quickly learning and adapting as the project evolved.
- Served as a core backend developer on a product with over 8 million users, delivering backend optimizations that reduced infrastructure costs and improved performance.
- Implemented comprehensive test coverage for backend services that previously had none, significantly increasing reliability and deployment stability.
- Built a small 2D game in Unity, expanding technical versatility and experience with cross-platform development.
- Collaborated closely with engineers and product teams to deliver performant, maintainable features in a fast-paced environment.

EDUCATION

Secondary School (11th Grade)

📅 09/2015 - Present

COURSES

100 Days of Code: The Complete Python Pro Bootcamp

PROJECTS

Modern StackOverflow Clone

🔗 https://github.com/nikitabiichuk2009/dev-overflow-next.js
- Full-featured Q&A platform with authentication, post creation, voting, and tag filtering.

Evently – Event Management Platform

🔗 https://github.com/nikitabiichuk2009/Events_Management_Platform"
- Platform for creating and managing events, with ticketing, scheduling, and user dashboards.

Threads Clone

🔗 https://github.com/nikitabiichuk2009/threads_nextjs
- Social app replicating key features of Meta Threads, including threads, comments, and profiles.

CarePulse

🔗 https://github.com/nikitabiichuk2009/Real-life-website-healt-care
- Patient management system handling registrations, records, and appointments.
